

PROFILE

Media Engineering and Technology student at the German University in Cairo combining full-stack engineering with photography, Adobe Creative Suite, and hands-on leadership. Led a nine-person team building an enterprise-style reimbursement system and contributed across frontend, backend, PostgreSQL, security, testing, and deployment. Experienced in TEDx visual identity, institutional media, and multidisciplinary coordination.

EDUCATION

German University in Cairo (GUC) — B.Sc. Media Engineering and Technology

In progress

Object-Oriented Programming · Programming Languages · Computer Architecture · Signals and Systems · Probability and Statistics

SKILLS

Full stack	TypeScript, React, Node.js, Express, REST APIs, Zod, PostgreSQL, SQL migrations
Programming & tests	Java, JavaFX, Python, C, Haskell, Prolog, Vitest, Supertest
Systems & tools	Git/GitHub, Arch Linux, Bash, npm workspaces, Vite, IIS, Windows Authentication
Creative	Photography, Photoshop, Illustrator, Lightroom, Premiere Pro, visual identity, photo/video editing

EXPERIENCE & LEADERSHIP

TEDx GUC2025–Present Media & Design Team. Develop visual identities and event assets with Adobe Creative Suite across digital and physical materials.	Student Union2023–2024 Head of Media & Science. Led the school TEDx chapter, official digital platforms, and institutional visual branding.	Construction Company2022–2024 Part-Time Site Supervisor. Coordinated engineers and 50+ workers while monitoring schedules under pressure.

SELECTED PROJECTS

- Travel Reimbursement System — Team Lead & Full-Stack Contributor

Jul–Aug 2026

TypeScript · React · Express · PostgreSQL · Zod · Vitest · Supertest · IIS/Kerberos

 - Led and coordinated a nine-person team building an internal travel workflow spanning Manager, Public Relations, Transportation, Timing, and Payroll.
 - Authored **62 of 106 commits** across architecture, UI, API/workflow logic, PostgreSQL, authentication, tests, documentation, and deployment preparation.
 - Implemented shared contracts, role/stage authorization, migrations, audit/revision history, secure sessions, CSRF protection, validation, and response redaction.
 - Maintained **185 automated tests** covering calculations, frontend services, APIs, authentication, authorization, and full workflow journeys; verified clean type-check and build.
- DoorDash: Scare vs Laugh Touchdown — Java/JavaFX Team Project

Apr–May 2026

 - Collaborated in a four-person OOP/MVC board-game team and authored **17 commits**, including the Monster information panel, visual assets, UI feedback, controller integration, and card/cell fixes.
- Hand & Movement Detector

2025

 - Built a real-time Python, OpenCV, and MediaPipe tool that tracks hand landmarks and renders freehand drawings over a live webcam feed.

RECOGNITION

Class Valedictorian — Grades 11 and 12 · SAT 1510 · Certificate of Excellence for Media & Science leadership · TEDx Leadership Award · Creative Writing Certification
