PROFILE

Media Engineering and Technology student at the German University in Cairo with hands-on experience leading a nine-person team to build an enterprise-style travel reimbursement platform. Contributed across frontend, backend, PostgreSQL, authentication, workflow design, automated testing, documentation, and Windows/IIS deployment preparation.

EDUCATION

German University in Cairo (GUC) — B.Sc. Media Engineering and Technology In progress
Relevant study: Object-Oriented Programming, Programming Languages, Computer Architecture, Signals and Systems, Probability and Statistics

TECHNICAL SKILLS

Full stack	TypeScript, React, Node.js, Express, REST APIs, Zod, HTML/CSS
Data & testing	PostgreSQL, SQL migrations, Vitest, Supertest
Programming	Java, JavaFX, Python, C, Haskell, Prolog, Bash
Systems & tools	Git/GitHub, Linux, npm workspaces, Vite, IIS, Windows Authentication, LDAP/Kerberos concepts

PROJECTS

Travel Reimbursement System — Team Lead & Full-Stack Contributor Jul–Aug 2026
TypeScript · React · Express · PostgreSQL · Zod · Vitest · Supertest · IIS/Kerberos

- Led and coordinated a nine-person team building an internal employee-travel workflow across Manager, Public Relations, Transportation, Timing, and Payroll review stages.
- Authored **62 of 106 commits**, contributing to monorepo architecture, UI, API/workflow logic, PostgreSQL integration, authentication, testing, documentation, and deployment preparation.
- Implemented shared TypeScript/Zod contracts, role- and stage-aware authorization, SQL migrations, audit events, append-only calculation revisions, and server-owned reimbursement calculations.
- Added IIS/Windows Authentication design, secure sessions, CSRF protection, rate limiting, validation, response redaction, and production runtime checks.
- Built and maintained **185 automated tests** covering calculations, frontend services, APIs, authentication, authorization, and full workflow journeys; verified clean type-check and production build.

DoorDash: Scare vs Laugh Touchdown — Java/JavaFX Team Project Apr–May 2026
Java · JavaFX · OOP · MVC · CSV

- Collaborated in a four-person team to build a board game with polymorphic Monster/Card hierarchies, specialized cells, custom exceptions, and CSV-driven data.
- Authored **17 commits**, including the Monster information panel and assets, UI feedback, controller/App integration, and card/cell behavior fixes.

Linux Home Server & Network Lab 2026
Debian · Arch Linux · Networking · System administration

- Repurposed a Sony Vaio as a headless Debian server with network storage; configured and diagnosed a multi-floor mesh/access-point network.

ADDITIONAL TECHNICAL EXPERIENCE

Delivered a technical presentation on Network Access Control covering 802.1X, posture assessment, Active Directory integration, firewalls, proxies, DNS, and DHCP.	Use Arch Linux as a daily development environment for Git workflows, builds, debugging, scripting, and system administration.
